QUANTUM BRIGHT

The new concentrated bleach based on phthalimido-peroxy-hexanoic acid (PAP) for white, coloured and delicate fabrics

03/2026

Concentrated automatic dosing

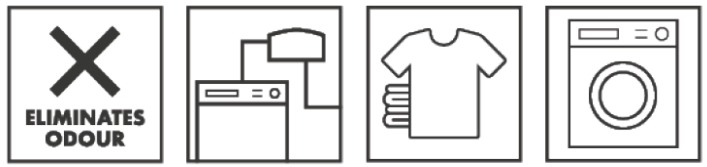

QUANTUM BRIGHT

Concentrated bleach based on phthalimido-peroxy-hexanoic acid (PAP) for white, coloured and delicate fabrics

Dosage: 3.5 – 8.5 ml/kg of dry laundry. The recommended dosage refers to use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

Directions for use: Optimised for use with Quantum system products. To be used exclusively with L-Brain Connect automatic dosing systems. Use during the pre-wash or main wash phase. Optimal bleaching performance at pH 8.5 – 9.5. Effective from 30° C.

Concentrated automatic dosing

QUANTUM BRIGHT

- Effectively removes stains from all types of white and coloured fabrics, including delicate textiles (excluding wool and nylon)
- Delivers professional laundry results from as low as 30° C, enabling energy savings, reduced cycle times and more efficient use of washing machines
- Reduces fabric wear compared to conventional bleaches, thanks to its lower activation temperature, ensuring longer linen lifespan and reduced operating costs over time
- Eliminates unpleasant odours
- Helps prevent fabric yellowing caused by alkaline residues during the drying phase, even under conditions of low alkalinity
- Reduced olfactory impact for greater operator comfort compared to conventional bleaches
- The product is not subject to regulations for the transport of dangerous goods (ADR/RID/IMDG/IATA)
